**Tuesday
September 23, 2008
2 – 4 p.m.
1302 Marine Science
Building**

The National Science Foundation (NSF) and many other funding agencies require an **evaluation** component in proposed projects. This workshop will provide information from a panel of experts about how you can:

- develop evaluation frameworks that distinguish your proposals from others
- scientifically evaluate the outcomes and effects of your project
- provide evidence that your project has been effective
- work with professional evaluation consultants
